## Parts of Plant

Plants have 4 main parts: the roots, the stem, the leaves and the flower. Each part has a very important job. The roots grow underground and hold the plants in place. They also get water and minerals from the soil. The stem supports the plants. It also moves the water from the roots to the leaves. The leaves make food for the plants. They also help the plant breathe. The flower makes seeds for the plant.

---

Q1. How many main parts do plants have?

Ans. \_\_\_\_\_.

Q2. Each part has a very important \_\_\_\_\_.

Ans. \_\_\_\_\_.

Q3. The roots hold the \_\_\_\_\_ in place.

Ans. \_\_\_\_\_.

Q4. The \_\_\_\_\_ supports the plant.

Ans. \_\_\_\_\_.

Q5. What makes seeds for the plant?

Ans. \_\_\_\_\_.
