

The Biggest Country

There are many countries on earth. The number is almost 200. Some countries are very big. Some are small. Countless people live in such countries. Many countries have more people than the others. Which country is the biggest? Russia is the biggest country in the world. Which nation has the largest population? China has the largest population. Russia is bigger than China. Russia could fit almost two China in it. Why doesn't Russia have a higher population than China if it is so big? All land is not built the same way, and Russia has a lot of very cold regions. People must live in areas with food and water. They must find jobs. They must be able to support themselves.
